1. Problem

- Users are overwhelmed by dozens of different applications.
- Switching between platforms reduces efficiency and comfort.
- We need a centralized, secure, and intuitive application for modern digital life.

2. Solution

- One app – endless possibilities.
- Communication, payments, shopping, services, entertainment and social networks under one roof.
- Mini-apps and modular architecture for future growth.

3. MMN Features

- Instant messaging, voice messages, video calls.
- Delivery, taxi, hotel reservations, marketplace.
- Payments via World Pay, peer-to-peer transactions.
- Sharing content to multiple social networks with one click.

4. Business model

- Freemium + premium subscription.
- Transaction fees (1.5–3%).
- Advertising (AI targeting), affiliate agreements.
- B2B licenses, white-label model.

5. Market potential

- Target group: mobile users 16–60 years old globally.
- Estimated market: >€100 billion per year (global applications).
- Strong demand for centralized solutions (super-applications).

6. ROI and Growth

- Year 1: 500k users, revenue €150–300k.
- Year 2: 2–7 million users, €5–7 million.
- Year 3: over €10 million, over €15 million.
- Year 3 ROI: 5x – 10x.

8. Competitive Advantages

- Everything in one place – no switching.
- Security and trust in transactions.
- Content personalization through AI.
- An ecosystem open to developers.

9. Team and Development

- Founding team with development, security and business experts.
- Agile development cycle, scalable architecture.
- Quick response to feedback and market trends.

10. We are looking for an investor

- Required investment: €1.500.000 - €2.000.000.
- Use: development, infrastructure, marketing, team growth
- In exchange for a share and strategic partnership.
- Goal: long-term growth and global expansion.
